Macedonia	9.01	9.01	El Salvado	21.52	21.52	India	50.78	30.15			

^aThe original dataset resource for 2009 IMRs used by Miller and Goldman was retrieved from the April 2010 CIA online edition, updated biweekly. The Bailey team (Nysetvold et al.) claimed in their paper to have located an "identical dataset" but instead used a different dataset retrieved from *The World Factbook* print edition containing less recent, estimated 2009 IMRs (information available as of January 1, 2009).

^bThe Bailey team's non-identical dataset contains 29 IMRs that vary from IMRs in the original Miller-Goldman dataset.

^cThe Bailey team inexplicably excluded six nations from their dataset and analyses.
